House 9, Islamabad

EDUCATION

Bachelors in Software
Engineering

Air University Islamabad

2022 - 2026

WEB DEVELOPMENT

- MERN Stack (MongoDB, Express.js, React, Node.js)
- RESTful API Development
- Backend Architecture & Authentication
- MongoDB
- SQL (Basic)

LANGUAGES

- JavaScript / TypeScript
- Python
- .NET
- Python

PROJECTS

CodeVisio

- Built a multi-language web compiler with real-time execution visualization.
- Set up CI/CD pipelines with GitHub Actions, containerized with Docker, and deployed to the cloud.
- Added monitoring and logging for stability and performance.

DoxXtract

- Built a web-based Next Js application to upload, process, and analyze PDF documents.
- Developed backend APIs in Node.js/Express for document extraction and integrated Hugging Face pre-trained models via APIs for NLP-based summarization and insights.
- Containerized services using Docker and deployed to the cloud with scalable architecture.

MB POWER CABLES – INDUSTRIAL MANAGEMENT SYSTEM

- Built a Python-based industrial management system for a power cable manufacturing company, digitizing core factory operations.
- Implemented enterprise-scale modules for vendor, inventory, and operational data management with centralized reporting.
- Designed industrial dashboards and scalable architecture to support real-world manufacturing workflows.

DEVOPS

- DOCKER
- KUBERNETES
- JENKINS
- GITHUB ACTIONS
- TERRAFORM
- ANSIBLE
